LinkedIn: [linkedin.com/in/pir-ahsan-raza](https://www.linkedin.com/in/pir-ahsan-raza)

## PROFESSIONAL SUMMARY

---

Detail-oriented Data Quality Specialist with 2+ years of experience in AI data annotation, quality assurance, and contributor support. Proven ability to evaluate visual content against structured guidelines, deliver actionable feedback to contributors, and maintain high accuracy under high-volume review operations. Skilled at unblocking contributors, resolving edge cases, and supporting remote teams. Seeking to leverage these capabilities in video data curation and trainer coordination for AI and robotics initiatives.

## KEY QUALIFICATIONS

---

- Exceptional attention to detail in visual data evaluation and quality review
- Experience delivering structured, actionable feedback to contributors and trainers
- Proven ability to manage high-volume review queues while maintaining consistency
- Skilled at identifying coachable vs. non-viable submissions and providing clear guidance
- Comfortable with Google Sheets, Excel, and data tracking platforms
- Available 20+ hours per week with flexible scheduling for remote work
- Reliable high-speed internet and experience with remote collaboration tools
- Strong written communication skills for clear guideline clarification and feedback delivery

## CORE COMPETENCIES

---

- |                                    |                                     |
|------------------------------------|-------------------------------------|
| • Data Annotation & Quality Review | • Contributor Support & Training    |
| • Content Moderation & Evaluation  | • Feedback Delivery & Documentation |
| • Edge Case Resolution             | • PII Handling & Data Privacy       |
| • Google Sheets & Excel            | • CVAT, LabelImg & Annotation Tools |
| • Python (Automation & Scripting)  | • AI Evaluation Frameworks          |

## PROFESSIONAL EXPERIENCE

---

### Data Labeling & Quality Review (Virtual Job Simulation)

Forage Academy | February 2026

- Evaluated 50+ customer support messages using structured schema (Intent, Sentiment, PII Flag), ensuring consistent application of quality guidelines
- Applied Keep/Fix/Flag framework to review peer label sets, identifying discrepancies and maintaining >95% accuracy across evaluations
- Resolved ambiguous edge cases (Billing vs. Technical intent, Neutral vs. Negative sentiment) with clear, documented rationale
- Delivered actionable, structured feedback to contributors to improve labeler output quality and guideline adherence
- Supported contributor community by clarifying guideline ambiguities, unblocking confusion, and minimizing drop-offs
- Proposed guideline refinements to standardize intent terminology, improving overall team consistency
- Applied privacy-aware judgment for sensitive data handling, including PII detection and proper flagging

**AI Data Annotation & QA Specialist**

*Remote Freelance | 2024 - Present*

- Annotated 1,000+ images using CVAT and Labelling for object detection (vehicles, people, household objects)
- Performed QA checks on labeled datasets, ensuring >95% accuracy and consistency across all submissions
- Evaluated AI-generated responses for correctness, clarity, and language quality against established criteria
- Managed data organization and tracking using Google Sheets and Excel for efficient workflow management
- Applied bounding boxes, segmentation, and text classification across multiple data types with precision
- Self-taught Python automation for data processing, improving workflow efficiency and reducing manual tasks

**EDUCATION**

---

**BS Software Engineering**

*Capital University of Science & Technology (CUST) | Expected Graduation: February 2028*

Relevant Coursework: Data Structures, Object-Oriented Programming, Software Quality Assurance

**CERTIFICATIONS & ACHIEVEMENTS**

---

- Completed Forage Data Labeling Job Simulation with focus on quality review, feedback delivery, and guideline refinement
- Maintained >95% accuracy across 1,000+ image annotations through rigorous self-QA processes
- Self-taught Python automation for data processing and workflow efficiency improvements
- Fluent in English (Professional) and Native in Urdu
